About the process:

Rather than asking clients to select every image that will appear in their albums - I have found that clients invariably choose the maximum number of images, which usually does not result in the most powerful album design - I prompt for a series of decisions about your favorite single in a number of categories. **These will not be the only images that appear in your album! Every image you list below will be used in a "place of honor" within the album, and I will select additional images as necessary to tell the story**

Instructions:

Please list the image numbers from the reverse side of your proof prints, or from your online gallery. These numbers should match. On the reverse of your prints, the number I need is the 3-digit number that follows your name: Your_Name_999.jpg.

There are also some choices to be made about the book binding. Please let me know if you have any questions about these!
